Timeline

View on Github   NPM Package   1.0.23

Display a vertical **timeline**, in different colors, sizes, and states

Colors   Yes   Sizes   No   Javascript   No   Variables   Yes

Default layout

Bulma-Extensions

○ JANUARY 2016

Timeline content - Can include any HTML element

FEBRUARY 2016

Timeline content - Can include any HTML element

2017

MARCH 2017

Timeline content - Can include any HTML element

End

Copy

```
<div class="timeline">
  <header class="timeline-header">
    <span class="tag is-medium is-primary">Start</span>
  </header>
  <div class="timeline-item">
    <div class="timeline-marker"></div>
    <div class="timeline-content">
      <p class="heading">January 2016</p>
      <p>Timeline content - Can include any HTML element</p>
    </div>
  </div>
  <div class="timeline-item">
    <div class="timeline-marker is-image is-32x32">
      <img src="http://bulma.io/images/placeholders/32x32.png">
    </div>
    <div class="timeline-content">
      <p class="heading">February 2016</p>
      <p>Timeline content - Can include any HTML element</p>
    </div>
  </div>
  <header class="timeline-header">
    <span class="tag is-primary">2017</span>
  </header>
```

Bulma-Extensions ⬡

```
      <i class="fa fa-flag"></i>
    </div>
    <div class="timeline-content">
      <p class="heading">March 2017</p>
      <p>Timeline content - Can include any HTML element</p>
    </div>
  </div>
  <div class="timeline-header">
    <span class="tag is-medium is-primary">End</span>
  </div>
</div>
```

♯ Colors

You can use color modifiers on timeline-marker to change its color

    <div class="timeline-content">
      <p class="heading">January 2016</p>
      <p>Timeline content - Can include any HTML element</p>
    </div>
  </div>
  <div class="timeline-item is-warning">
    <div class="timeline-marker is-image is-32x32">
      <img src="http://bulma.io/images/placeholders/32x32.png">
    </div>
    <div class="timeline-content">
      <p class="heading">February 2016</p>
      <p>Timeline content - Can include any HTML element</p>
    </div>
  </div>
  <header class="timeline-header">
    <span class="tag is-primary">2017</span>
  </header>
```

Bulma-Extensions

```
      <i class="fa fa-flag"></i>
    </div>
    <div class="timeline-content">
      <p class="heading">March 2017</p>
      <p>Timeline content - Can include any HTML element</p>
    </div>
  </div>
  <header class="timeline-header">
    <span class="tag is-medium is-primary">End</span>
  </header>
</div>
```

You can use them together

Start

○   JANUARY 2016

  Timeline content - Can include any HTML element

  FEBRUARY 2016

  Timeline content - Can include any HTML element

2017

  MARCH 2017

  Timeline content - Can include any HTML element

End

Copy

```
<div class="timeline">
  <header class="timeline-header">
    <span class="tag is-medium is-primary">Start</span>
  </header>
```

Bulma-Extensions ⬚

```html
        <div class="timeline-content">
          <p class="heading">January 2016</p>
          <p>Timeline content - Can include any HTML element</p>
        </div>
      </div>
      <div class="timeline-item is-warning">
        <div class="timeline-marker is-warning is-image is-32x32">
          <img src="http://bulma.io/images/placeholders/32x32.png">
        </div>
        <div class="timeline-content">
          <p class="heading">February 2016</p>
          <p>Timeline content - Can include any HTML element</p>
        </div>
      </div>
      <header class="timeline-header">
        <span class="tag is-primary">2017</span>
      </header>
      <div class="timeline-item is-danger">
        <div class="timeline-marker is-danger is-icon">
          <i class="fa fa-flag"></i>
        </div>
        <div class="timeline-content">
          <p class="heading">March 2017</p>
          <p>Timeline content - Can include any HTML element</p>
        </div>
      </div>
      <header class="timeline-header">
        <span class="tag is-medium is-primary">End</span>
      </header>
    </div>
```
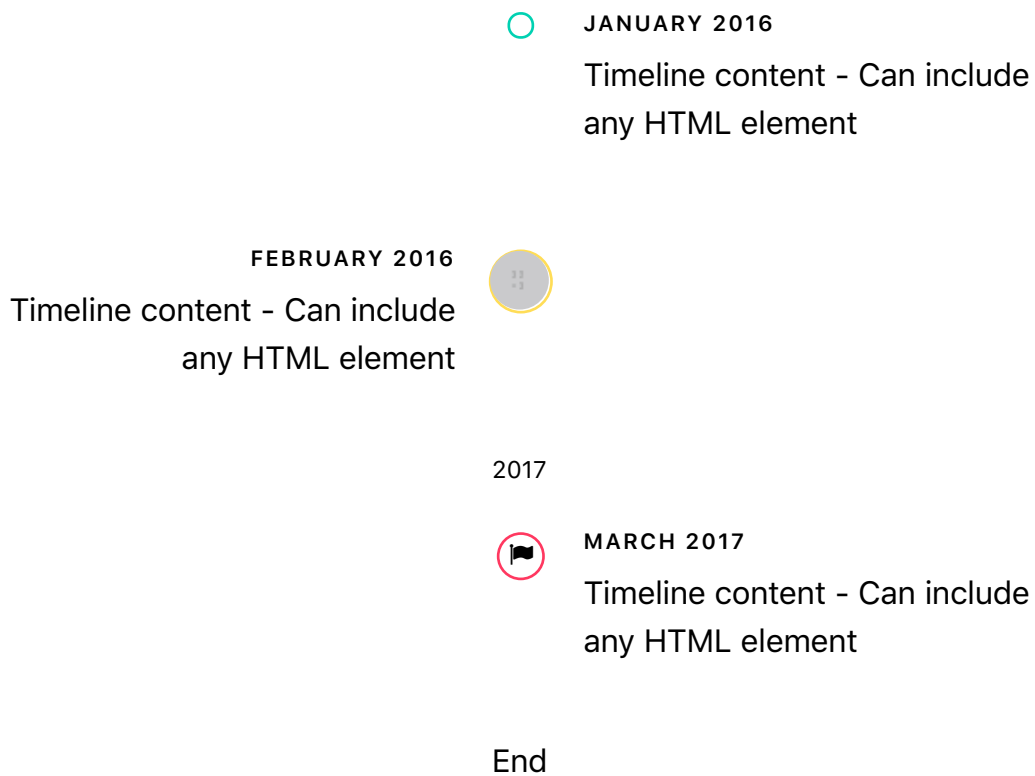

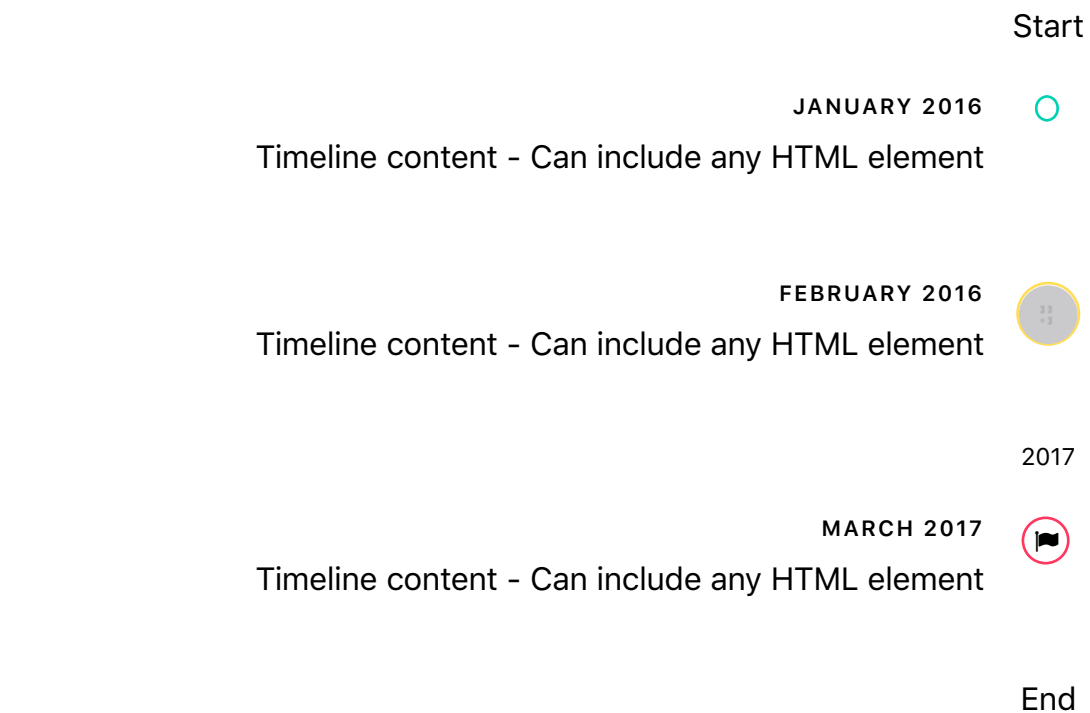

⨦ Positions

You can use the `is-centered` modifiers on timeline

Bulma-Extensions

○ **JANUARY 2016**

Timeline content - Can include any HTML element

FEBRUARY 2016

Timeline content - Can include any HTML element

2017

▣ **MARCH 2017**

Timeline content - Can include any HTML element

End

Copy

```html
<div class="timeline is-centered">
  <header class="timeline-header">
    <span class="tag is-medium is-primary">Start</span>
  </header>
  <div class="timeline-item is-primary">
    <div class="timeline-marker is-primary"></div>
    <div class="timeline-content">
      <p class="heading">January 2016</p>
      <p>Timeline content - Can include any HTML element</p>
    </div>
  </div>
  <div class="timeline-item is-warning">
    <div class="timeline-marker is-warning is-image is-32x32">
      <img src="http://bulma.io/images/placeholders/32x32.png">
    </div>
    <div class="timeline-content">
      <p class="heading">February 2016</p>
      <p>Timeline content - Can include any HTML element</p>
    </div>
```

Bulma-Extensions

```
          <span class="tag is-primary">2017</span>
      </header>
      <div class="timeline-item is-danger">
        <div class="timeline-marker is-danger is-icon">
          <i class="fa fa-flag"></i>
        </div>
        <div class="timeline-content">
          <p class="heading">March 2017</p>
          <p>Timeline content - Can include any HTML element</p>
        </div>
      </div>
      <header class="timeline-header">
        <span class="tag is-medium is-primary">End</span>
      </header>
  </div>
```

You can use `is-rtl` modifiers on timeline

SNIPPET

Start
